<b>LinkedIn:</b> <a href="https://www.linkedin.com/in/tobincav/">https://www.linkedin.com/in/tobincav/</a>	Seattle, WA 98117 & Bismarck, ND

## Skills:

Hard Skills		Certifications
<ul style="list-style-type: none"><li>• C Programming</li><li>• Out of the box &amp; critical thinking</li><li>• C#, C++, Rust, Python, Java, JavaScript</li><li>• Unity &amp; Raylib game development</li></ul>	<ul style="list-style-type: none"><li>• Debugging</li><li>• Ambitious learner</li><li>• Self motivated</li></ul>	<ul style="list-style-type: none"><li>• Unity Developer Certified</li></ul>

## Experience:

### Software Engineer Internship

<b>Electroimpact</b>	Mukilteo, WA	Summer 2024 & Summer 2023
<ul style="list-style-type: none"><li>• Engineered a GUI application for precision controlling and measuring with high-end laser trackers.</li><li>• Installed a Foundation Reference System (FRS) and performed laser tracker accuracy validation. Validated multiple laser trackers for Electroimpact and customers, including Boeing, resulting in saving of ten thousand dollars for a new tracker.</li><li>• Acquired training in Metrolog X4 and robotic arm simulation across numerous official training sessions.</li><li>• Designed robot pathing for safely 3D scanning objects using the Creaform Metrascan Black Elite mounted on the KUKA LBR iiwa robot arm.</li><li>• Used heavy power tools on numerous projects, including drilling stainless steel, concrete, and constructing wood frames.</li></ul>		

## Personal Projects:

### sstr.h – “Stack Strings” C library

<b>Programming Library</b>	Bismarck, ND & Seattle, WA	Summer 2024
<ul style="list-style-type: none"><li>• Createdsstr.h, a high-performance novel implementation string modification library for C, innovating on C string manipulation.</li><li>• Implemented a previously considered impossible concept that improves performance, memory usage, and safety.sstr.h results in 2x faster execution and decreasing the chances of crashes and memory leaks by a factor of ten.</li></ul>		

### Fstr – “Fancy Strings” C library

<b>Programming Library</b>	Bismarck, ND	Summer 2024
<ul style="list-style-type: none"><li>• Createdfstr, a high performance and safe string library for C making use of a novel string architecture. This method invalidates the most common programming security exploits responsible for billions of dollars of losses.</li><li>• Allowed programmers to use C strings in a safer way, performing complex functionality quickly, conveniently, and without concerns about crashes.</li><li>• Wrote more than 64 functions for manipulating and modifying strings, totaling over 1400 lines of tested code.</li><li>• Handmade beautiful and functional web documentation, used by many to learn the library.</li></ul>		

## Upon The Wind

<b>Video Game</b>	Seattle, WA	Spring 2023
<ul style="list-style-type: none"><li>• Developed procedural generation tooling in order to create a fully-fledged game in Unity using object oriented programming.</li><li>• 3D modeled and textured 25+ aesthetically pleasing art assets and animations using Blender, resulting in a beautiful and highly performant game that stays at a constant 60fps.</li><li>• Designed a cohesive, Ghibli-like art style and nine unique environments using the URP render pipeline and post processing library.</li></ul>		

## Education:

Bachelor of Computer Science	University Of Mary	Bismarck, North Dakota	Expected Graduation: April 2027
